

WHAT IS CLAIMED IS:

1. A home medical examination system comprising:
a user terminal for a client requesting a home
medical examination to make a request for a medical
examination of a disease,
5 a medical center terminal for transmitting a
medical examination chart created including instructions
on a medical examination of a disease made in response
to said request for a medical examination of a disease
and on emergency measures based on the examination and
instructions on a prescription for a medicine and on the
use of medical equipment based on said medical
examination of a disease to said user terminal and a
facility for compounding said medicine, and
10 a pharmacy terminal for giving instructions on
delivery of the medicine compounded at said compounding
facility based on said medical examination chart and
said medical equipment and sending the instruction
result as delivery information to said user terminal and
said medical center terminal.
15
20 2. The home medical examination system according to
claim 1, wherein
said medical center terminal conducts interactive
communication with said user terminal to receive image
information and voice information of said client

102020-26358860

requesting a home medical examination from said user terminal in response to a request for a medical examination of a disease from said user terminal.

3. The home medical examination system according to claim 2, wherein

5 said user terminal includes a camera for receiving input of said image information and a microphone for receiving input of said voice information.

4. The home medical examination system according to claim 1, wherein

5 said user terminal, said medical center terminal and said pharmacy terminal are connected through a communication network including the Internet.

5. The home medical examination system according to claim 4, wherein

5 said client requesting a home medical examination makes a request for a medical examination of a disease by accessing said medical center terminal through said user terminal and entering request information into a home medical examination request of a predetermined format prepared in said medical center terminal.

6. The home medical examination system according to claim 1, further comprising

T02070-26E56360

5 a health insurance society terminal for receiving
said medical examination chart from said medical center
terminal and said delivery information from said
pharmacy terminal.

7. The home medical examination system according to
claim 1, wherein

5 said user terminal, said medical center terminal,
said pharmacy terminal and said health insurance society
terminal are connected through a communication network
including the Internet, and

10 said health insurance society terminal receives
 said medical examination chart from said medical
center terminal and said delivery information from said
pharmacy terminal through said communication network.

8. The home medical examination system according to
claim 6, wherein

5 said health insurance society terminal calculates
costs of a medical examination and medical
treatment conducted in response to said request for a
medical examination of a disease based on said medical
examination chart and said delivery information.

9. A home medical examination method comprising the
steps of:

 making a request for a medical examination of a

T02020 "26E56860

disease through a user terminal,

5 transmitting a medical examination chart created
including instructions on a medical examination of a
disease made in response to said request for a medical
examination of a disease and on emergency measures based
on the examination and instructions on a prescription
10 for a medicine and on the use of medical equipment based
on said medical examination of a disease from a medical
center terminal to said user terminal and a facility for
compounding said medicine, and

15 giving instructions on delivery of the medicine
compounded at said compounding facility based on said
medical examination chart and said medical equipment and
sending the instruction result as delivery information
from a pharmacy terminal to said user terminal and said
medical center terminal.

20 10. The home medical examination method according to
claim 9, wherein

5 said medical center terminal conducts interactive
communication with said user terminal to receive image
information and voice information of said client
requesting a home medical examination from said user
terminal in response to a request for a medical
examination of a disease from said user terminal.

11. The home medical examination method according to

202070-263568860

claim 9, wherein

said user terminal, said medical center terminal
and said pharmacy terminal are connected through a
communication network including the Internet.

5

12. The home medical examination method according to
claim 11, wherein

said client requesting a home medical examination
makes a request for a medical examination of a disease
5 by accessing said medical center terminal through said
user terminal and entering request information into a
home medical examination request of a predetermined
format prepared in said medical center terminal.

13. The home medical examination method according to
claim 9, wherein

a health insurance society terminal receives said
medical examination chart from said medical center
5 terminal and said delivery information from said
pharmacy terminal.

5

14. The home medical examination method according to
claim 9, wherein

said user terminal, said medical center terminal,
said pharmacy terminal and said health insurance society
5 terminal are connected through a communication network
including the Internet, and

09885392-070204

10 said health insurance society terminal receives
 said medical examination chart from said medical
 center terminal and said delivery information from said
 pharmacy terminal through said communication network.

15. The home medical examination method according to
 claim 13, wherein

5 said health insurance society terminal calculates
 costs of a medical examination and medical
 treatment conducted in response to said request for a
 medical examination of a disease based on said medical
 examination chart and said delivery information.
